

As a health and safety professional, taxpayer and a person who drives 40,000 miles a year, I am very upset about Mexican trucks being permitted to enter this country and use our roads without the same compliance standards as American trucks. This will result in many accidents and deaths and it is hard to believe our government would allow this. This must be stopped. This is a domestic kind of terrorism that the American public must be protected from. There are enough problems with our own trucks and the State Police trying to enforce standards without adding this. Families will be wiped out due to accidents caused by blowouts and failed equipment. Those of us on motorcycles are especially at risk. PLEASE protect us!!!!
